

CAPABILITIES STATEMENT

MISSION STATEMENT

To be the vendor of choice for high quality, professional services at a competitive cost, allowing us to attract, motivate, and retain employees with skill sets and work ethics necessary to exceed client needs.

COMPANY OVERVIEW

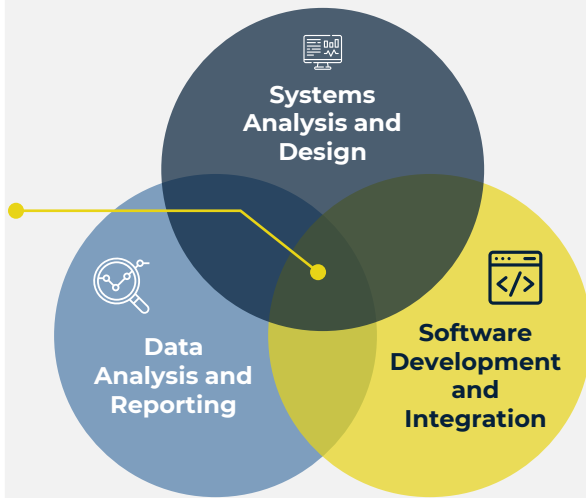

Founded in 2003, Marieke Consulting, Inc. is a **woman / veteran owned and operated small business** headquartered in the Washington DC metropolitan area. We pride ourselves on our team of talented, versatile, and highly skilled analysts, managers, engineers, developers, and subject matter experts.

DIFFERENTIATORS

Provide user-centric solutions leveraging knowledge of business processes and data

Nurture client requirements throughout system lifecycle for continuous improvement

Automate workflows and present information to maximize efficiency

Systems Analysis and Design

A strong understanding of the requirements is an essential component of any product for our clients. By working closely with end-users and stakeholders, we analyze existing processes and strive to eliminate redundancy by streamlining and automating processes. When reengineering a system, we also will include new features into a better, easy to maintain design.

Data Analysis and Reporting

We provide reports that are easily read and provide essential information in a logical presentation. We excel at collecting data from disparate sources and reporting out metrics and indices that are key indicators to business performance.

Software Development and Integration

We develop and deploy integrated solutions that fit the client`s budget, schedule, and expectations. We provide the training and user support that are essential to the success of the software and to our customer`s organization.

EXPERIENCE

Regional Information System (REGIS)

Federal Aviation Administration, Capital Budget Systems

Marieke provides end-to-end lifecycle management for the REGIS system including design, development, testing, training, and day-to-day operations. REGIS provides standardized and timely tracking of financial data, and facilitates reconciliation with official accounting data in DELPHI.

iHub Manager

Federal Aviation Administration, Operating Budgets Division

Marieke designed, developed, and currently maintains the Information Hub (iHub) system. iHub centralizes and curates source data, then converts it to "information" which is organized, integrated, enriched and optimized to support budget analytics and reporting.

Corporate Work Plan (CWP)

Federal Aviation Administration, Capital Budget Systems

Marieke supported all aspects of the CWP modernization including architecture, requirements, design, development, data migration, training and deployment. Our team currently supports ongoing development, business analysis, and financial management requirements/integrations/reporting.

TECHNICAL SKILLS

- **Database:** Oracle 11g/12c/19c RAC, Exadata, SQL Server
