CORE COMPETENCIES

DIFFERENTIATORS:

Marieke's combination of service offerings enhances efficiency by streamlining processes, reducing redundancy, and leveraging automation for optimized performance.

Software & Systems Engineering

We deliver Agile PM and SDLC support—from sprint planning and CI/CD to UI/UX, development, testing, release management, and help desk. Our infrastructure services span cloud, on-prem, and DevSecOps. We drive modernization/transformation through automation, low-code, open source, mobility, & IT strategic planning.

Business & Financial Management

We provide forecasting, budgeting, payroll, and financial system support, leveraging federal tools like Delphi, PRISM, and E2. Our services include strategic planning, risk management, scheduling, resource optimization, and AI-driven automation for digital transformation.

Data Integration & Insights

We provide data management services, including big data modeling, integration, security, and governance—plus analytics for trends, risk, and predictive insights. Our advanced solutions include Artificial Intelligence (AI) Machine Learning (ML), data engineering/ETL, data warehousing, and real-time processing.

PAST PERFORMANCE

FAA Financial Systems & Modernization

Agency: Federal Aviation Administration, Capital Budgets

Contract #: DTFAWA10A00136 / 693KA921F00168

Contract Value: \$11,593,345 **PoP:** July 2021 – April 2026

REGIS integrates capital funding and execution data with FAA financial systems to support accurate budget execution, reconciliation, oversight, and decision-making. Marieke provided full lifecycle development, modernization, testing, training, help desk, and production operations.

Enterprise Budget & Workforce Analytics

Agency: Federal Aviation Administration, Operating Budgets

Contract #: 693KA919D00004 / 693KA919D00004 (EY Prime)

Contract Value: \$10,489,898 **PoP:** July 2019 – August 2027

iHub and iTools integrate, reconcile, and validate financial, payroll, and staffing data from multiple authoritative FAA sources. Automated reporting and forecasting provide reliable, decision-ready insights for budget execution, workforce planning, and management oversight.
